Chromeleon Report Templates for McNeil

Technical
Development

EC
KONSULT

The Commitment

EC Konsult is covering the need of Chromeleon Report Template development and maintenance for Analytical Development at McNeil AB. This commitment covers the complete development cycle from plan to integration, where all the activities are subordinated the Computerized System Validation procedures at McNeil AB. To be successful in a development process like this, a continuous dialog is required. With McNeil AB this dialog is very successful.

Documentation

EC Konsult is acting as author and pre-reviewer of plans, requirement specifications, design specifications, test specifications and other relevant documentation of the development process.

Implementation

Chromeleon Report Template are implemented by EC Konsult following the requirement and design specifications. Implementation demands knowledge of data processing, database management and programming areas.

Testing

In line with the Computerized System Validation procedures at McNeil AB, EC Konsult is also performing tests of implemented Chromeleon Report Template.

Chromeleon is a modern, widely used chromatography data management system capable of controlling a large number of instruments, and of storing, processing and reporting chromatography data.

- EC Konsult (EC) helps McNeil AB to develop and test templates in Chromeleon in accordance with McNeil AB User Requirement Specifications. EC uses McNeil AB validation process and documentation templates as well as McNeil AB regulations, on which they are trained. Development of the templates requires specialist knowledge, which is difficult for the routine users to gain and maintain. EC has provided such knowledge which has led to a very fruitful collaboration between EC and McNeil AB.

Fredrik Kuylenstierna and Lena Cedergren, McNeil AB

EC Konsult, a knowledge-based company with about forty employees, located in the south of Sweden. EC Konsult is a part of EC-gruppen.
